Controller

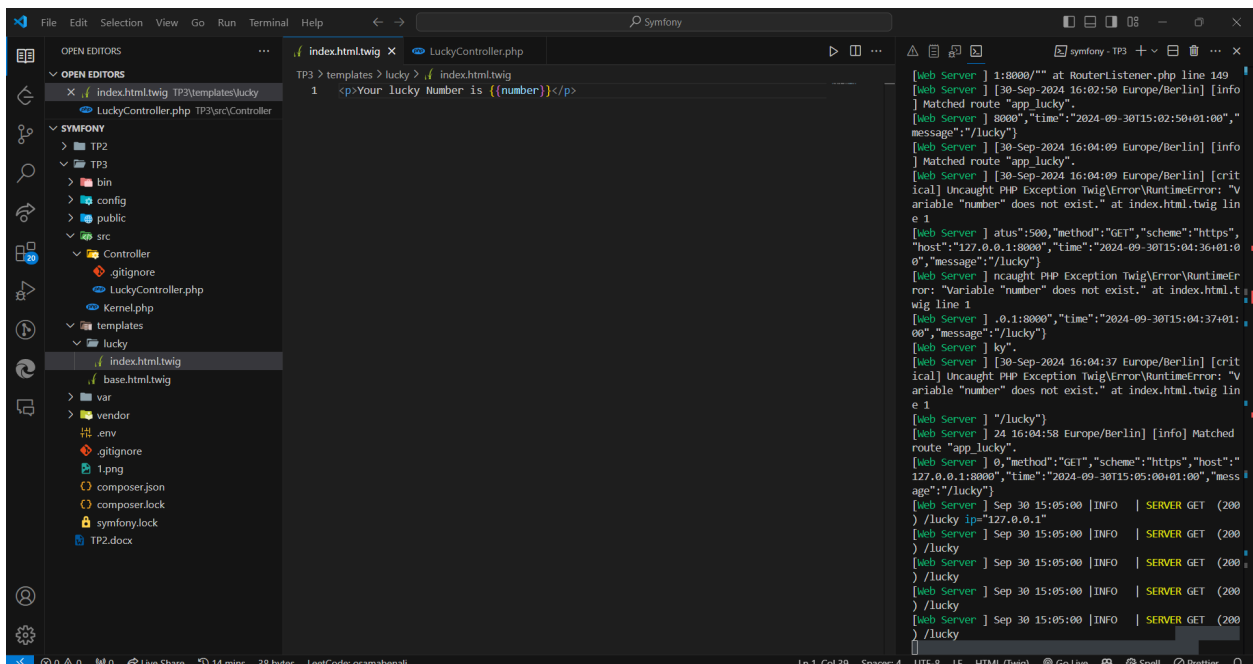

The screenshot shows the VS Code editor with the `LuckyController.php` file open. The file contains the following code:

```
1 <?php
2
3 namespace App\Controller;
4
5 use Symfony\Bundle\FrameworkBundle\Controller\AbstractController;
6 use Symfony\Component\HttpFoundation\Response;
7 use Symfony\Component\Routing\Attribute\Route;
8
9 class luckyController extends AbstractController
10 {
11     #[Route('/lucky/number', name: 'app_lucky')]
12     public function index(): Response
13     {
14         $number = random_int(1,100);
15         return $this->render('lucky/index.html.twig', [
16             'controller_name' => 'luckyController',
17             'number' => $number
18         ]);
19     }
20 }
21
```

The console output on the right shows the following messages:

```
